

ACACIA

BREEDERS REFERENCE: LE16/326 TRAIL STATUS: RECOMMENDED UK

HIGHEST YIELDING CONVENTIONAL VARIETY WITH PERFORMANCE COMPARABLE TO HYBRIDS. EXCELLENT PERFORMANCE ACROSS ALL AREAS OF THE UK.

ANYTHING BUT CONVENTIONAL

KEY STRENGTHS

Highest yielding conventional variety

Highly vigourous variety

Robust plant type with good straw strength

Good disease resistance

Proven on farm and Trial performance across a number of years

	ACACIA	Blazen	Campus
Gross Output			
UK	106.6	101.3	101.8
East / West	106.9	101.2	101.8
North	104.4	102.3	101.9
Agronomic Characteristics			
Lodging Resistance	8	[8]	8
Stem Stiffness	9	9	8
Plant Height (cm)	150	152	158
Earliness of Flowering	6	6	6
Earliness of Maturity	5	5	5
Oil Content (@ 9% Moisture)	45.7	44.7	45.5

Data from the AHDB Oilseed Rape Recommended List 2021/22. On the 1-9 scales, high figures indicate that a variety shows the character to a high degree (e.g. high resistance). [] = limited data. Agronomic features marked with * are breeders perspective.

SOWING WINDOW

Recommended Sowing Period

Potential Sowing Period depending on seasonal conditions

Acacia is the highest yielding conventional variety available on the recommended list and in its second year of recommendation has proven on farm and trial performance. With key agronomic characteristics of strong autumn and spring vigour, solid disease resistance and short, stiff straw, combined with a high oil content.
