**ECHO MAIZE**

**DESCRIPTION**

- **Type:** Very early maturing
- **Feed:** High starch and CWD content
- **Yield:** Very high

**ADVANTAGES**

- Safe & early harvest
- High energy density
- No yield penalty

**RECOMMENDED USAGE**

- Forage Maize

**AGRONOMICS**

- NEW! Expected to be listed as First Choice on the BSPB/NIAB 2022 Recommended List
- Very early maturing (MC10) delivering quality yields in a short growing season
- Medium height with good early vigour
- Low, well-filled cobs on a strong plant with good standing ability

**FEEDING**

- High starch content and good starch yields making Echo an ideal variety for diets high in grass silage
- Improved cell wall digestibility in combination with high starch levels, creating energy dense maize to boost livestock performance and reducing bought in feed costs

**YIELD**

- Excellent yield comparable to some later maturing varieties

**BSPB/NIAB Data:** *Estimated Position First Choice Less Favourable List 2020*

**MATURITY CLASS**

- 10 (FAO 170)
- VERY EARLY

**DM YIELD**

- *104%
- VERY HIGH

**STARCH YIELD**

- *107%
- VERY HIGH

**ME CONTENT**

- *11.7 MJ/KG
- EXCELLENT
