BSPB/NIAB Descriptive List for Forage Maize 2020

Limagrain

Briefly: LG30.179 Maize is an early variety with massive starch yields, suitable for forage or grain use. For more information, contact Limagrain at 01472 371471 or visit their website at www.lgseeds.co.uk.
**LG30.179 Maize**

**Maturity Class**
- 8 (FAO 180)
- Early

**Ear Starch Yield**
- 106%
- Excellent

**DM Yield**
- 100%
- Good

**ME Content**
- 11.7 MJ/KG
- High

**Description**
LG30.179 is early to harvest (MC8) and suitable for growing on all mainstream sites. Superb early vigour for rapid establishment of crop cover. Good eyespot tolerance.

**Agronomics**
- LG30.179 is early to harvest (MC8) and suitable for growing on all mainstream sites.
- Superb early vigour for rapid establishment of crop cover.
- Good eyespot tolerance.

**Feeding**
- LG30.179 has rapid cob dry down that is well adapted for grain or crimped cropping.
- A medium height plant with large cobs, maximising energy from starch.

**Recommended Usage**
- Forage Maize
- Anaerobic digestion
- Grain/crimping

**Yield**
- Proven in Danish Farmer’s Union trials to be both early and high yielding.
