

LG Diablo

One hell of a good barley!

Market Options: Brewing, Malt Distilling & Feed

MBC Approval: MBC Approval

Open the Gates to Opportunity!

LG Diablo is the highest yielding spring barley variety with full approval for both brewing and malt distilling on the [AHDB Recommended List](#).

The variety has shown consistent yield potential in the key malting barley growing areas of the East and North regions.

It is medium in height, similar to RGT Planet with a strong agronomic profile. LG Diablo also has a very good disease resistance package reflected by having a very high untreated yield on the [AHDB Recommended List](#).

LG Diablo has very good physical grain quality with a high hot water extract; a trait heavily desired by the end user. It also has low grain nitrogen and a specific weight better than Laureate. The variety has been given [Full Approval for both Malt Distilling and Brewing](#) by the [Malting Barley Committee \(MBC\)](#), which is an interesting prospect for growers and end users.

As well as being a dual use malting variety, LG Diablo also makes an excellent and high yielding feed barley.

Strengths

- Highest Yielding, Fully Approved Dual Use Variety
- Full Approval for both Malt Distilling and Brewing by the Malting Barley Committee (MBC)
- Non GN-producer
- High Specific Weight
- Good agronomics for on-farm performance
- High tillering capacity for suitability in a blackgrass situation
- High hot water extract
- Low grain nitrogen

Technical Information
