

Revelation

Safe and secure

Nabim Group: Group 4

Market Options: UK Distilling, UKS soft wheat for export & Feed

OWBM Resistance: No

Rotational Position: First Cereal & Second Cereal

Sowing Date: Early & Normal

Soil Type: Heavy Soils

Revelation is an almost 'perfect' variety agronomically. It has approval for distilling and export and performs well as an early drilled wheat and second wheat. The variety has a high untreated yield; a consequence of having the best disease resistance profile of all varieties on the 2019/20 AHDB RL.

Strengths

- High yielding
- Highest disease resistance combination score on the 2019/20 AHDB RL
- Good grain attributes, offering a wide range of market options
- Outstanding agronomic package, offering security for drilling date & fungicide applications

Specific Weight (kg/hl)	76.5	76.1	77.8	77.6

Experts Advice

Revelation is believed to carry the Pch1 Rendezvous resistance gene to Eyespot but this has not been verified in RL tests. Revelation's combination of stiff straw, excellent disease resistance and also slow apical development in the spring, make it suitable for sowing from early September onwards.

The latest safe sowing date for Revelation is the end of January.
