

# Tyfon

## Leafy forage for summer use

**End Use:** Dairy & Beef

**Utilisation:** Graze in situ & Zero Graze

**Sowing period:** Early Summer & After cereals

**Utilisation Period:** Summer & Autumn

**Regrowth:** Yes

**Tyfon is ideally sown in the spring and utilised in the summer months when grass growth generally declines.**

Tyfon should not be sown too early as it is susceptible to bolting. Tyfon's growth habit is very leafy with regrowth potential.

### Strengths

- Hybrid turnip
- Fast leafy growth
- UK proven
- Fantastic summer feed
- Re-growth potential
