

# Catch Crop

## Blended Ryegrass for sowing after maize or potatoes

**Use:** Mainly Cutting

**Animal:** Most Livestock

**Length of use:** Short (Up to 2 Years)

**Available with Clover:** No Clover

**Blended ryegrass for sowing after maize or potatoes.**

Catch Crop is a productive blend of ryegrasses; mostly Italian for high yields of short term silage. It can be sown following maize where it will utilise nitrogen and reduce run off and leaching.

Catch Crop is also a useful crop to follow potato harvest.

### Strengths

- Excellent breakcrop
- Rapid establishment
- Will mop up nitrates after maize
- Excellent after potatoes

- Very high yields for cutting

## Technical Information

For detailed information, download our [Sinclair McGill Grass and Forage Crops Handbook](#) or for your [local stockist](#), please contact your local distributor.

## Experts Advice

Sow from late March to early October if conditions permit.
