

Intensive Grazing

Nutritious grazing for more meat or milk

Use: Mainly Grazing

Length of use: Long Term

Production System: Extensive & Intensive

Animal: Dairy, Beef & Sheep

Clover: White Clover

Management System: Extensive & Intensive

A mixture formulated to maximise intakes and increase production from grazed grass.

Intensive grazing contains only high energy, palatable and digestible Tetraploid grasses, which together with white clover, produce a mixture which maximises production from grazed grass.

Strengths

- Highly palatable and highly digestible tetraploid grasses increase the rate of digestion, leading to improved voluntary intakes
- Outstanding energy content means more milk and meat from every bite

- High sugars and digestible fibre improve digestion efficiency
- Treated with Headstart® GOLD

Technical Information

Pack Size: 13kg acre unit.

For variety constituents, please download the latest Monarch Brochure, which can be found on the right hand side of this page. 2018 Monarch Brochure.
