

Pasture Renovation Short Term

For boosting production of existing leys for up to 2 years

Use: Slot Seeding/Overseeding

Animal: Most Livestock

Length of use: Short to Medium (2 - 5 Years)

Available with Clover: No Clover

For boosting production of existing leys, for up to 2 years.

This mixture will really “pep up” your pasture and give it a new lease of life.

Best cut for silage or hay but will also give useful aftermath grazing. Designed to perform for 12-18 months after sowing.

Treated with HEADSTART® GOLD for improved establishment.

Strengths

- Rapid germination
- Competes well in existing swards
- Includes Italian Ryegrass for substantial boost in production
- 12-18 month lifespan
- Increases palatability of the old sward

Technical Information

Assess viability of overseeding, then choose the most suitable method.
