

Activate Forage

Performance fuel!

Maturity: Very Early

Site Type: Favourable & Less Favourable

Sowing Type: Open

Activate maximises maize silage energy density, improving dry matter intakes and boosting performance from every kilo fed in your ration.

With the highest ME content of all varieties available on the BSPB/NIAB List, Activate is suitable for feeding for dairy, beef or AD systems.

Activate is a Limagrain Animal Nutrition (LGAN) accredited variety.

Strengths

- Very early maturing (MC10) delivering an excellent result in a short growing season
- Good cob tip cover and stays green up to harvest, reducing the risk of Fusarium infection
- Activate has the TOP ME content (11.82 MJ/kg) of all varieties available on the BSPB/NIAB List
- Ideal for feeding to dairy, beef or as a feedstock in AD systems
- It's high starch content and superior cell wall digestibility (59.5%)

- produces energy dense maize, reducing bought in feed costs
- Although Activate has a moderate dry matter yield, it has a very high starch yield

Technical Information

See table below for technical information on Activate. Full data available in the [Maize Variety Selection Guide 2019 PDF](#) (or download, right)

MATURITY CLASS	DM YIELD	CELL WALL DIGESTIBILITY	ME CONTENT
10 (FAO 140)	94%	59.5%	11.82 MJ/KG
