

LG 30.179

A great all rounder!

Maturity: Early

Sowing Type: Open

LG30.179 is an early variety with massive starch yields, suitable for forage or grain use.

LG30.179 is early to harvest (MC8) and suitable for growing on all mainstream sites. It has superb early vigour for rapid establishment of crop cover.

Strengths

- Early to harvest (MC8) and suitable for growing on all mainstream sites
- Superb early vigour for rapid establishment of crop cover
- Good eyespot tolerance
- Rapid cob dry down that is well adapted for grain or crimped cropping
- A medium height plant with large cobs, maximising energy from starch
- Proven in Danish Farmer's Union trials to be both early and high yielding

YIELD T/HA (@15% MC)	RELATIVE YIELD (%)	GRAIN MOISTURE (%)
9.6	110	36.0
