

Mantilla

Massive dry matter and energy yields per hectare!

Maturity: Intermediate

Site Type: Favourable

Sowing Type: Open

An exciting new variety for AD, delivering high yields of highly digestible feedstock.

Strengths

- Excellent early vigour for rapid early season growth
- Mantilla has excellent digestibility, improving potential methane production
- An impressive leafy tall crop with large cobs that maximises production per hectare
- Mantilla has been tested in Limagrain AD trials and has impressed for yield
