

Conrad CL

Clearfield® herbicide resistance trait

Type: Restored Hybrid

Status: Common Catalogue

Clubroot Resistant: Non-Resistant

Clearfield®: Yes

Resistance Traits: Pod Shatter

Conrad CL is a high yielding hybrid with the Clearfield® herbicide resistance trait. The variety offers vigorous establishment, good winter hardiness and strong disease resistance to safeguard crop potential. Conrad CL also has pod shatter resistance and a high oil content.

Excellent broad leaved weed and volunteer control from Clearfield® varieties will potentially reduce the levels of erucic acid contamination, helping to avoid quality claims and rejections. Clearfield® OSR is tolerant of any possible residues of sulfonylurea (SU) herbicides used in the previous crop, minimising establishment risk in difficult autumns.

Strengths

- Clearfield® herbicide resistance trait

- High yield potential
- Vigorous establishment with good winter hardiness
- High oil content
- Pod shatter resistance
- Very strong tolerance to verticillium wilt

Technical Information
