

Sprinter

Very fast to establish

Target: Blackgrass Control

Scheme: Basic Payment Scheme

Area: Cover Crop

Sowing period: Summer/Autumn

Sprinter is very fast to establish and can help reduce blackgrass.

Ideal mixture for use as an EFA catch crop (31st August to 1st October).

Mixture Formulation:

70% Black Oat Silke

30% Vetch

Strengths

- Very fast to establish
- Can help reduce blackgrass levels

- The pure oats produce a substance called Avenocins, which is antagonistic to blackgrass germination
- Ideal mixture for use as an EFA catch crop (31st August to 1st October)
- Black Oat Silke is a non-host to Root Lesion and Stubby Root nematodes
- Very good weed suppressant

Technical Information

Seed packed in 20kg bags.

Sow August to September at 25-30kg per hectare.

Rothwell, Market Rasen,
Lincolnshire, LN7 6DT
