

Tendrila

Vigorous petit pois with very high yields in comparison to Waverex

Type: Petit Pois

Tendrila has market-leading yield potential and was bred specifically for the UK by Vilmorin in France.

The optimal TR's can be met more easily with this semi-leafless variety, resulting in a uniform maturity across the crop. Tendrila has a very high yield in comparison to Waverex.

Tendrila is an excellent choice! The variety is a vigorous petit pois which means it can be grown where Waverex cannot. It has an afilea alternative to Waverex.

Download our [Vining Pea Brochure](#) for more detailed information.

Strengths

- Vigorous variety with high yields
- Market-leading potential
- Uniform maturity

Technical Information

Technical information for Tendrila is below.

	TENDRILA
Maturity: Days After Avola	10
Yield: % of Oasis @TR100	118
Yield: Tonnes/Ha @TR100	4.7
Soil Type Suitability	Medium

	TENDRILA
Leaf Type	Afila
First Flowering Node	17
Vigour (1-3)	2
Average Plant Height (cm)	70
Pod Set	Double
Flowering Habit (D/SD)	SD
Powdery Mildew Resistance	Susceptible
Downy Mildew Tolerance (1-9)	5
Wilt (Race 1)	Susceptible

	TENDRILA
% Large Sieve (>10.2mm)	0
% Medium Sieve (10.2 to 8.75mm)	22
% Small Sieve (8.75 to 7.5mm)	64
% Very Small Sieve (<7.5mm)	14
Average Sieve Size	2.14
Thousand Seed Weight (g)	110
