

LG30.179

LG30.179 MAIZE

An early variety with massive starch yields, suitable for forage or grain use.

LG30.179 MAIZE

DESCRIPTION

Type: Early

Feed: High starch yields

Yield: High

ADVANTAGES

■ Assured harvest

■ Reliable feed value

■ Confident performance

RECOMMENDED USAGE

Forage Maize

Anaerobic digestion

Grain/creasing

AGRONOMICS

- LG30.179 is early to harvest (MC8) and suitable for growing on all mainstream sites
- LG30.179 has superb early vigour for rapid establishment of crop cover
- LG30.179 has good eyespot tolerance

FEEDING

- LG30.179 has rapid cob dry down that is well adapted for grain or crimped cropping
- A medium height plant with large cobs, maximising energy from starch

YIELD

- Proven in Danish Farmer's Union trials to be both early and high yielding

Limagrain Fitcon Data: 2016-2020 trials

MATURITY CLASS

8 (FAO 190)
